

Connect

SAFE SPACE 2020

Your wellbeing is Connect's #1 priority. Here's what we're doing to protect your health and peace-of-mind so you can focus on getting down to business.

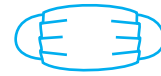

Connect is committed to implementing conscious and intentional processes to not only combat this virus, but promote healthy best practices that you can adopt at your own events and will become a consistent priority for all of our events during high- and low-risk time periods alike.

Connect firmly believes that we have to be the leaders in showcasing safe conferences while still allowing all attendees to have fun and book business.

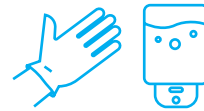

More detailed
info on our overall
Connect Safe + Clean Plan
on the next page.

Temperature checks will be conducted before entering the event.

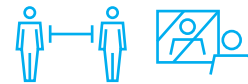

Cloth masks will be required for attendees and staff at a minimum. KN95 masks will be provided for any attendee or staff who wants one.

Glove and hand sanitizer stations will be available throughout the event.

Disinfectant foggers will be placed in the exhibit hall area.

New appointment design allows for social distancing measures and **plexiglass shields** will be placed on appointment tables.

Indoor/outdoor spaces will be used as much as possible.

Larger aisle ways and one-way only aisles in the trade show and appointment areas help manage traffic.

Education sessions will be set up to allow for 6' space between chairs.

F&B will be provided in a no-contact way (i.e. pre-packaged food, no self-serve buffets).

There will be no large general sessions this year at Connect.

SAFE + CLEAN PLAN

Temperature checks will be conducted before entering the event.

As more health measures become available, we will research their implementation. Anyone with an elevated temperature or fever will not be allowed into the show.

Cotton masks will be required for attendees and staff at a minimum. KN95 masks will be provided for any attendee or staff who wants one.

We will provide up to 3 cotton masks per attendee in a variety of colors. (Maybe one that can match your outfit!) KN95 masks are almost identical in performance to the N95 mask used by hospital employees, but are not in short supply for healthcare workers. The C.D.C. lists KN95 masks as a suitable alternative when N95s are not available.

No onsite registration lines.

We will cut down contact while still coming together. We will ship you a welcome kit with your badge, an KN95 mask, gloves, hand sanitizer, sanitizing wipes, agenda, magazine and other conference materials. You can even upload a picture to your badge so other attendees can see your smiling face..

Glove and hand sanitizer stations will be available throughout the event.

We are ordering enough nitrile disposable gloves for each attendee to wear 3x a day. Touchless hand sanitizer stations will be plentiful throughout the trade show floor and in common areas.

Disinfectant foggers will be placed in the indoor convention space.

We will have professional disinfectant electrostatic sprayers that will continuously disinfect the air and neutralize germs.

New appointment design allows for social distancing measures and plexiglass shields will be placed on appointment tables.

Sanitizer will also be on every appointment table and they will be wiped down between appointments.

Indoor/outdoor spaces will be used as much as possible.

For as many receptions, education sessions and other breakouts during the programming, we will find creative ways to use indoor/outdoor spaces.

Larger aisle ways with dedicated travel lanes in the trade show and appointment areas help manage traffic.

This will keep attendees from bumping into each other or crowding in certain areas on the trade show floor.

Education sessions will be set up to allow for 6' space between chairs.

The trade show floor and other spaces will also have 6' space markers for attendees to follow so they know an acceptable amount of space to leave in between each other.

F&B will be provided in a no-contact way (i.e. pre-packaged food, pre-packaged silverware, no self-serve buffets).

Extra funds will be spent on service staff who will be serving coffee and refreshments for each attendee while wearing gloves, masks and protective gear. Grab and go pre-made alcoholic and non-alcoholic drinks and other items will be ready and sanitized at receptions for the utmost safety.

There will be no large general sessions this year at Connect.

Instead, the money we'd normally put toward an A-list celebrity keynote will now be spent on showcasing and implementing the most cutting-edge safety precautions into the programming that attendees can use as inspiration for their own events.

Connect has always strived to be as eco-friendly and sustainable as possible. We know that these precautions make our event less environmentally sound as we'd like, but during this time the safety of our attendees takes precedence. We hope you will understand.

Are you concerned about flying? Research has shown that there is very little risk of any communicable disease being transmitted on board an aircraft. Did you know that the quality of aircraft cabin air is carefully controlled? Ventilation rates provide a total change of air 20-30 times per hour. Most modern aircraft have recirculation systems, which recycle up to 50% of cabin air. The recirculated air is usually passed through HEPA (high-efficiency particulate air) filters, of the type used in hospital operating theatres and intensive care units, which trap dust particles, bacteria, fungi and viruses.
